

WHAT'S NEW WESTBOROUGH?

Community Center Update

Select Board Advances Community Center Project

At its June 9, 2026, meeting the Select Board voted to resume the Community Center project by authorizing the Town Manager to execute necessary change orders with CHA (Owner's Project Manager services) and BH+A (architectural design services). This action allows the project to resume with a focus on designing and bidding the entire first floor of the Community Center, and the pool, elevator, and secondary stairs. The motion includes requirements for at least two public engagement sessions and one stakeholder meeting to ensure continued community input throughout the design process. The work will proceed within the remaining funds previously approved by Town Meeting. The amended motion was unanimously approved by a 5-0-0 vote.

Background

The Town of Westborough acquired the property at 1500 Union Street in 2023 with the intent of developing a multigenerational community center to house both the Senior Center and Recreation Department. Funding for acquisition and initial due diligence was approved at the 2023 Fall Town Meeting, followed by additional appropriations in October 2024 to support continued design development and cost analysis.

Since acquisition, the Town has undertaken multiple planning and engagement efforts, including:

- Selection of an Owner's Project Manager and architectural design team;
- Development of schematic designs and phased renovation concepts;
- Extensive public engagement sessions throughout 2024;
- Evaluation of furniture, finishes, and operational layouts; and

Presentation of updated design and cost estimates in January 2025.
